

**REMARKS**

Claims 1-8, 13 and 14 are allowed. Minor amendments to some of the allowed claims are submitted to correct grammatical errors and logical inconsistencies. Claims 9 and 10 are objected to for failing to positively recite a method. These claims are amended to conform to the Examiner's request. In addition, some redundant language has been removed, consistent with the Examiner's request. Claims 11 and 12 are rejected for being indefinite. Applicant has amended the claims to make clear that the claimed subject matter is a computer readable medium with executable instructions.

The Applicant thanks the Examiner for identifying allowable subject matter. Applicant notes the Examiner's statement of reasons for allowing the claims. The Examiner identifies certain limitations that distinguish the invention over the prior art. Applicant notes that the identified limitations should be considered in combination with the remaining claim elements, which in the aggregate, define the patentable subject matter.

In view of the foregoing amendments and remarks, it is respectfully submitted that the application is now in condition for allowance. If there are any other residual formalities that need to be resolved prior to allowing the application, the Examiner is requested to contact the undersigned.

The Commissioner is hereby authorized to charge any appropriate fees to Deposit Account No. 03-3117.
